DETAILED ACTION

Receipt is acknowledged of request for refund filed on 9/18/200. Claims 1-42 are pending in the application and the status of the application is as follows:

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Clarification is requested with respect to this claim. What is the difference between the herb Arnica Montana and Arnica Chamissonis foliosa? Documentation is requested.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-5, 7-39 and 41-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of U.S. Patents 5,431, 924 ('924) and 5,795,573 ('573) and 6,444,238('238) and Skin Care and Cosmetic Ingredient Dictionary page 40, 1994.

The instant application is claiming Therapeutic composition and method of treating arthritis or pain comprising:

1. EMU oil

Art Unit: 1615

2. *Arnica Montana*

3. *Rosemary oil*

4. *Eucalyptus oil*

5. *Camphor*

6. *Ethanol*

7. *Fragrance*

The patent '924 teaches EMU oil as an anti-inflammatory along with eucalyptus oil. See the abstract, see col.2, lines 38-40, see col.4, lines 50-58 and see example 1 where the patent also teaches perfumes or fragrance. The patent '573 teaches *Arnica Montana* in pain relieving compositions and anti-inflammatory compositions. See the abstract, see col.2 and see the examples where the formulation is in the form of gel, crème and lotion. The patent '238 teaches ingredients 3-5 in pain relieving compositions. See the abstract, see col.2, lines 1-55 and see the examples. Thus all these patents teach some of the ingredients together for treating pain. The dictionary is cited to show that the alcohol is used in the cosmetics as solvents.

Accordingly it would have been obvious to one of ordinary skill in the art at the time the invention was made to prepare compositions of '924 and it with *Artica Montana* of '573, and *Rosemary oil, eucalyptus oil, and camphor* of '238 and add *ethanol* which is used conventionally as a solvent expecting beneficial effect to the skin which is treating inflammation. The idea of combining the ingredients flows logically from the art for having been used for the same purpose. This is a prima facie case of obviousness.

Art Unit: 1615

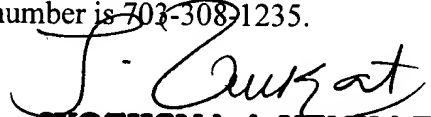

5. Claim 40 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. **The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.**
